

## Bindit Softproof

**Please use the Fuji CA QSS 5 6000 ICC profile only to simulate the print preview in your software and not as a working profile of image data.**

### ICC Profile installation for Mac

#### Adobe programs

For Adobe programs, the ICC profile must be copied into the folder: Library\Application\_Support\Adobe\Color\Profiles

#### Other programs (e.g. Quark Express)

For programs other than Adobe, the ICC profile must be copied into the folder: Ordner Library\Colorsync\Profiles

This is where the alias for the Adobe profile can also be found.

### ICC Profile installation for Windows

#### Adobe programs

For Adobe programs, the ICC profile must be copied into the folder: C:\Programme\Gemeinsame\_Dateien\Adobe\Color\Profiles

#### Other programs (e.g. Quark Express)

For programs other than Adobe, the ICC profile must be copied into the folder: Windows\System32\Spool\Drivers\Color.

#### Tip

For Windows, the color profile settings with administrator rights can be made with a right click on Profile > Profile installation and copied into the directory.

### Using ICC Profile in Adobe Programs

In Photoshop, the menu option "More options" must be activated. In Illustrator and InDesign, the menu option 'Advanced Mode' must be activated.

### Tips for Color Settings

Color working space: sRGB IEC61966-2.1
