

Bindit Pro Upload

PROFIUPLOAD

Convenient upload for pros and advanced users

Please note

The Pro Upload specifications cannot be used with the Online Designer! Double-page spreads designed according to these specifications can only be used with Pro Upload!

For professionals

Welcome to Bindit!

We are proud that continually more professionals have begun using our photo album with a heart for their own work.

For the professional, we offer a direct upload of your data (in either JPG zip files or PDF).

If you are creating the album using Photoshop, InDesign or a similar software program, please use our specifications. You can download our templates or our color profile for a soft proof.

Send

Design your photo album with e.g. InDesign, Photoshop or another program and send us the data over our Pro Upload platform.

It is important that you follow our specifications.

One double sheet = one double-page = two individual pages

It is possible to order a book with less than 26 pages; however, the basic price for the 26-page book will be charged.

Books with over 140 pages (70 spreads) or with special options can be made by request.

The best thing about it: NO BARCODES on your photo albums

2. Bonded Leaf

For those who want to start off with a panorama view – the endpapers are glued down turning your book into a movie screen.

Pro Upload - review and upload your photo data

In order to achieve perfect results, it is extremely important to follow our [photo album design guidelines](#). If you have any questions, you can reach us at any time at: service@bindit.de

Checklist for **Flying Leaf** **Bonded Leaf**

- soft proof has been carried out
- all pages have been formatted as double-pages
- minimum of 13 double-pages (26 pages)
- data labeled in the right sequence (001, 002, 003)
- photo resolution is 300 dpi for optimal results
- data format is JPG (zip files) or PDF (via Acrobat Pro)

Endpapers are glued down – turning your photo album into a movie screen

I have read the above checklist and I am aware that Bindit cannot check the data for accuracy.

With the Bonded Leaf option, you can start right off with a panorama photo. Or let your book end with a panorama photo.

First double-page (your pages 1 & 2)

Standard double-page

Last double-page

1. Flying Leaf

For all those, who like the feel of turning the endpapers – it does not only feel good, but gives you a genuine photo album feeling.

Pro Upload - review and upload your photo data

In order to achieve perfect results, it is extremely important to follow our [photo album design guidelines](#). If you have any questions, you can reach us at any time at: service@bindit.de

Checklist for **Flying Leaf** **Bonded Leaf**

- soft proof has been carried out
- all pages have been formatted as double-pages
- left half of the first double-page is white (blank)
- right half of the last double-page is white (blank)
- minimum of 13 double-pages (26 pages)
- data labeled in the right sequence (001, 002, 003)
- photo resolution is 300 dpi for optimal results
- data format is JPG (zip files) or PDF (via Acrobat Pro)

Endpapers you can turn over for that genuine photo album feeling

I have read the above checklist and I am aware that Bindit cannot check the data for accuracy.

 CHOOSE FILE TO UPLOAD

With the Flying Leaf option, it is important that the left side of the first double-page and the right side of the last double-page are left white (blank).

First double-page

Standard double-page (layflat panorama possible)

Last double-page

Double-page sizes

For both sizes applicable:

- Always format the data in sRGB sRGB IEC61966-2.1.
- Title the double-pages with a number (001, 002, ..., 010, 011, ...) and submit the data as JPG zip file using pro upload.
- If you are using a PDF document, the order (of your images/photos) is determined by the PDF.
- Do not place any elements directly on the trim lines as this could result in ragged edges or important elements may be cut off.
- Please format the document without register crosses or crop marks!

Measurements in pixels or centimeters are given including trim

Double-page landscape A3

(book block final dimensions after trimming 42,0 cm x 29,7 cm)

Width x height pixels or cm	Resolution in dpi	Width x height pixels or cm
9992 x 3579 pixels or 84,6 x 30,3 cm The double-sided measurements include trim	300	A margin of 21 pixels or 0.3 cm will be trimmed around the double-pages and is already accounted for in the given measurements.

Double-page landscape A4, A5, & Piccolo

(book block final dimensions after trimming 29,7 cm x 21,0 cm)

Width x height pixels or cm	Resolution in dpi	Width x height pixels or cm
7087 x 2551 pixels or 60 x 21,6 cm The double-sided measurements include trim	300	A margin of 21 pixels or 0.3 cm will be trimmed around the double-pages and is already accounted for in the given measurements.

Double-page 30 x 30, 21 x 21, Mini & Piccolo

(book block final dimensions after trimming 29,7 cm x 29,7 cm)

Width x height pixels or cm	Resolution in dpi	Width x height pixels or cm
7087 x 3579 pixels or 60 x 30,3 cm The double-sided measurements include trim	300	A margin of 21 pixels or 0.3 cm will be trimmed around the double-pages and is already accounted for in the given measurements.

Title the double-pages of JPGs with a number in following format (001, 002, ..., 010, 011, ...) Submit your data if JPGs as zip file or as PDF file.

Questions: Then just write to us at: info@bindit.de or contact us directly at our bookbinding manufacture under: +49 40 875 0 9800. We are available Monday-Friday between 9am and 4pm.

Bindit Softproof

Please use the Fuji CA QSS 5 6000 ICC profile only to simulate the print preview in your software and not as a working profile of image data.

ICC Profile installation for Mac

Adobe programs

For Adobe programs, the ICC profile must be copied into the folder: Library\Application_Support\Adobe\Color\Profiles

Other programs (e.g. Quark Express)

For programs other than Adobe, the ICC profile must be copied into the folder: Ordner Library\Colorsync\Profiles

This is where the alias for the Adobe profile can also be found.

ICC Profile installation for Windows

Adobe programs

For Adobe programs, the ICC profile must be copied into the folder: C:\Programme\Gemeinsame_Dateien\Adobe\Color\Profiles

Other programs (e.g. Quark Express)

For programs other than Adobe, the ICC profile must be copied into the folder: Windows\System32\Spool\Drivers\Color.

Tip

For Windows, the color profile settings with administrator rights can be made with a right click on Profile > Profile installation and copied into the directory.

Using ICC Profile in Adobe Programs

In Photoshop, the menu option "More options" must be activated. In Illustrator and InDesign, the menu option 'Advanced Mode' must be activated.

Tips for Color Settings

Color working space: sRGB IEC61966-2.1

For simulating devices: Fuji CA QSS 5 6000
